

“Combating the ‘Diabetes’ Epidemic”

Friday, August 6th from 9am at The University Club of the
University of Western Australia, Crawley

A free public symposium highlighting four years of research into the twin epidemics of diabetes and obesity. Learn about the latest discoveries helping to stem the diabetes and obesity tide. Hear about cutting-edge research and initiatives to prevent and manage these twin epidemics.

Presented by the Centre for Food & Genomic Medicine, a research cluster established to tackle the twin epidemics of diabetes and obesity, based at the Western Australian Institute for Medical Research.

Official Opening By:

Hon. Helen Morton MLC

Parliamentary Secretary to the Treasurer; Commerce; Science and Innovation; Housing and Works; Water; Mental Health.

Guest Speakers:

Professor Ian Caterson

Director, The Institute of Obesity, Nutrition and Exercise N.S.W.

Professor Richard Head

Director, CSIRO Preventative Health Flagship S.A.
